Analysis of Students Feedback

Report

The feedback received from the students studying in 3rd year, 2018-19, reveals that they are satisfied with most of the facilities provided to them by the college but it does not live up to the expectations of all the students. Though the number of students who have rated poor fluctuates between 5% to 13% and do not exceed the number of students who have rated excellent, good and satisfactory but the negative rating cannot be simply ignored.

The areas like coverage of Honours and General syllabus, the academic content, evaluation process and fairness of evaluation have been positively rated with few exceptions. However around 12.84% of students rate the usefulness of teaching materials negatively.

Interaction with the Office, Teachers and Principal has also been rated positively with a few numbers who find it to be poor.

Roughly around 9% of the students find the facilities of Library, Recreational and Extra - curricular activities to be poor while the remaining find it to be good. More or less the students are happy with the sports facilities.

The analysis shows that students rated the communication skills of teachers, their relationship with teacher to be good. There were more ratings in the column of Good in the case of Internal assessment. The activities of the students' Union were also satisfactory.

With around 40% rating the existing building and infrastructure as good and a small 5% rating it as poor the scenario looks pretty well.

The analysis of the feedback indicates that there are still some areas which need to be monitored so that the root cause of problems is sorted out for the coming years. Few students declined to comment and in such case it becomes even challenging to understand the reason, it could also be out of ignorance or fun.
